CASH IN ON CHAOS NEWSLETTER - March 28, 2000- 00-3

Dr. Hans Hannula, voice 303-452-5566, fax 303-457-9871, email allarson@cashinonchaos.com

Stocks stage impressive rebound rally. Tbonds also rally. IBM congesting. Interest rates continue to rise. Which economy is real? Swiss Franc tries to rally. Gold heads down. Wheat rally ending. World markets perk up. Energy and money explained. The Master clock and the rally. The Hand of God forecast and inversions.

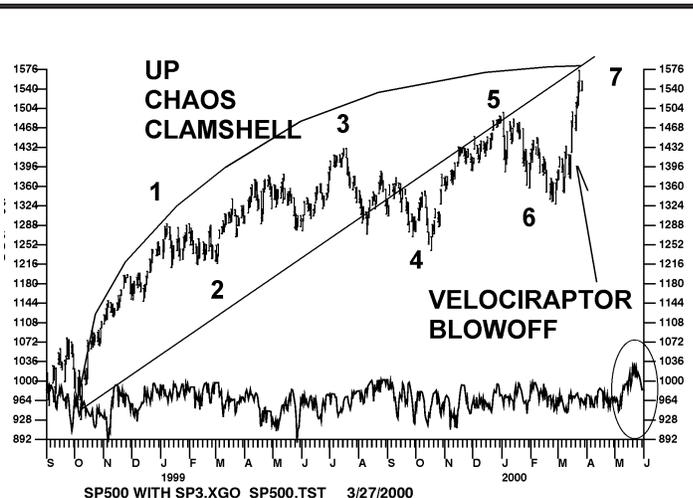

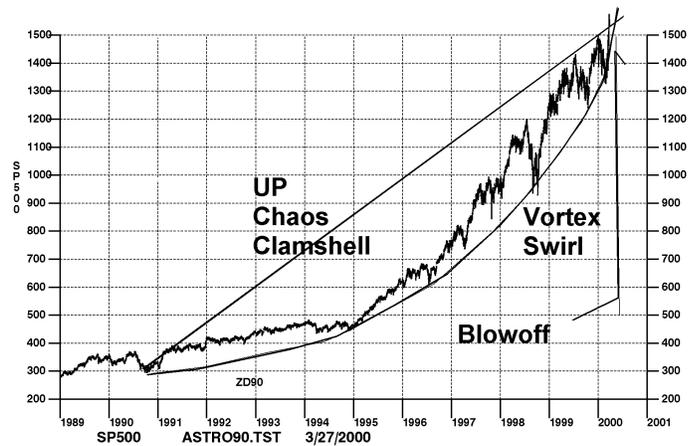

STOCKS

Stocks have staged a spectacular rally to marginal new highs. It is typical at the end of a long move to get a fast blowoff rally. That may be what we are seeing now.

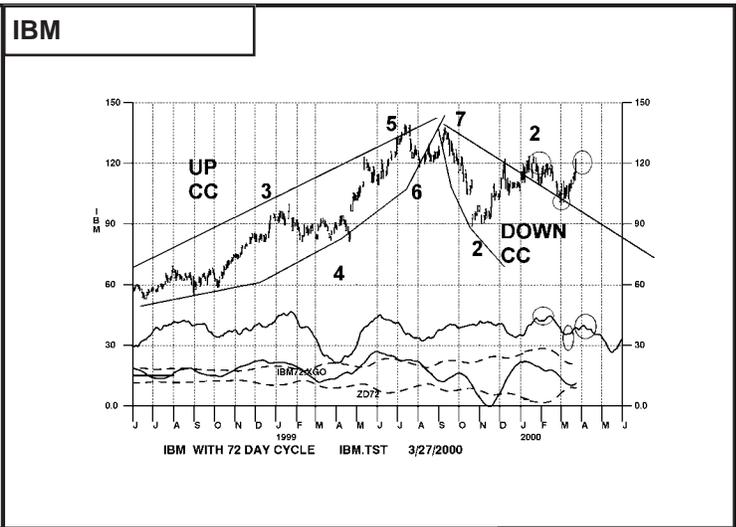

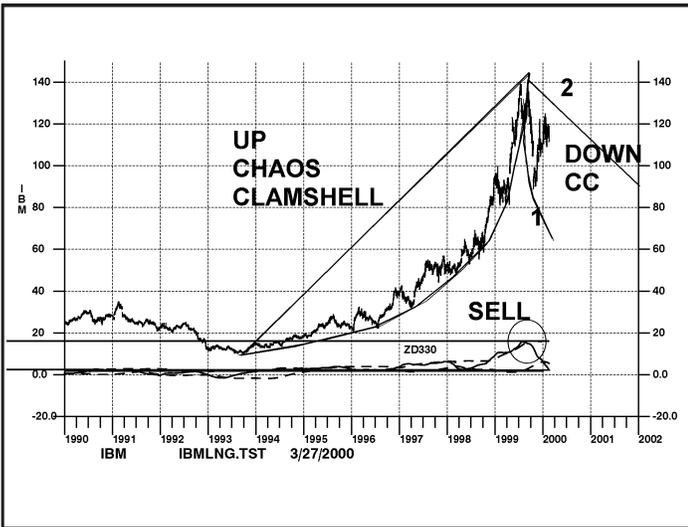

The long term chart shows the up Chaos Clamshell for the past decade. The bottom of this Chaos Clamshell is a Vortex Swirl. This curve gets steeper and steeper. Just when you think it is all over, prices drop down to the Vortex Swirl and suddenly get swept higher very rapidly. Very often this is "the last hurrah."

The near term chart shows a redrawn up Chaos Clamshell from last October. In running markets, Chaos Clamshells often occur on several scales due to a property called fractal expansion. Chaos Clamshells have seven moves. It is not uncommon to think that a smaller clamshell has ended and a new one has begun. Then suddenly, like the Velociraptor in Jurassic Park, the bulls attack from the blind side. This is a normal property of chaotic systems. It is one reason why markets are so difficult to predict. Traders, of course, protect themselves by using stops.

While this rally appears to be losing steam, we may see some congestion as a top is formed. The SP3.XGO has rising energy into May.

This letter is written by Dr. Hans Hannula, full time trader, PhD (Electrical and Computer Engineering), RSA, CTA. It incorporates his original scientific research into market chaos, its causes, patterns, and trading techniques. The Chaos Clamshell shown is the unclassified version of the confidential **Hannula Market Fractal**, which is taught in his **Cash In On Chaos** course. **Hotline updates to this letter are give at 7 PM Eastern, 1-900-776-7272, \$3 per minute for 2-3 minutes,\$6-9 total.** See page seven for more details.

IBM appears to still be in move 2 of a down Chaos Clamshell. The long term chart shows the dramatic up CC which ended last year. Since then prices have dropped in a move 1, followed by a move 2 corrective rally.

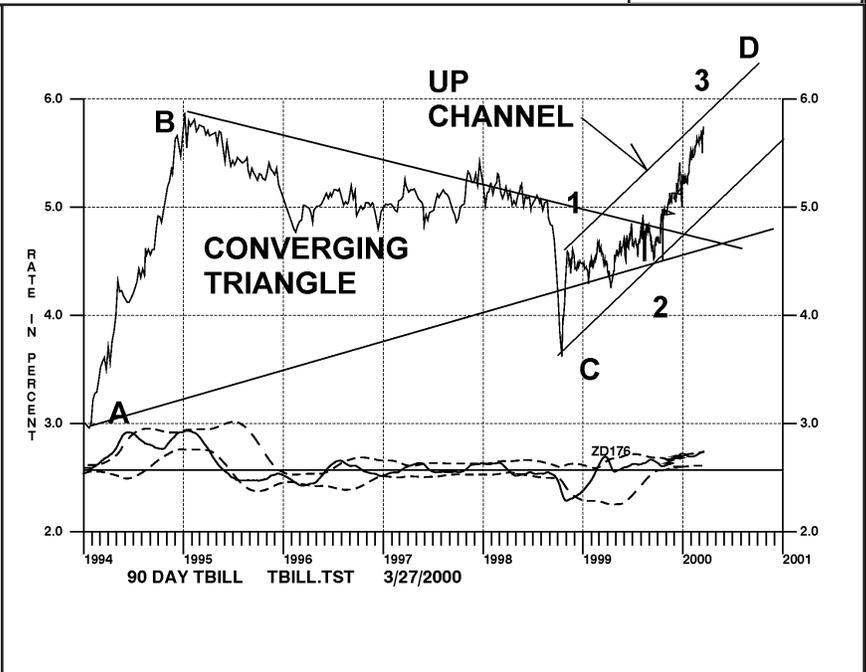

The near term chart shows this move 2 rally in more detail. Note the highs and the lows coincide with the 72 day XGO energy cycle. That cycle is now turning down.

For stocks or commodities not covered in this newsletter or on the hotline, you can track the cycles and trade the Chaos Clamshells using the **Trading System Toolkit**.

ECONOMY/RATES

Interest rates continue to climb, with the Fed raising interest rates for the 5th time.

The chart shows interest rates in a strong up channel following the breakout from the large converging triangle. This pattern forms a large zig-zag, shown by letters A, B, C, and D. In this type pattern it is usual for move CD to equal move AB. That would project interest rates reaching about 6.6 percent. The second most probable projection is that CD will equal 1.27 times AB. That would forecast interest rates at 7.2 percent.

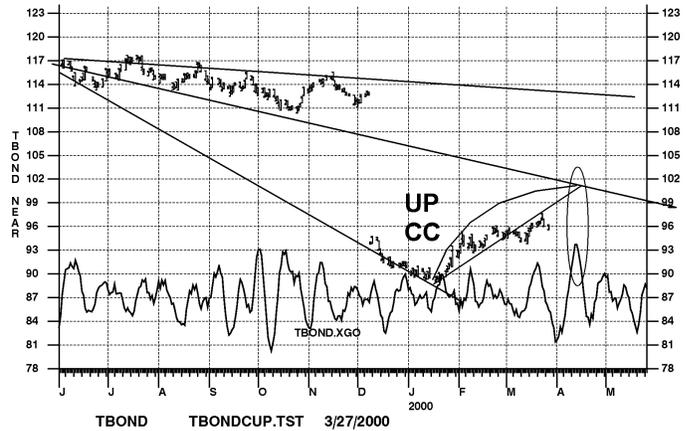

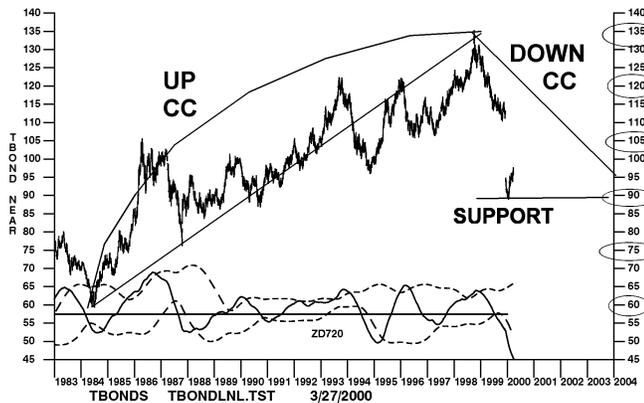

These rising rates and recent rally have sparked a wide spread discussion about the New Economy, represented by the Nasdaq and the Old Economy represented by the blue chip industrial stocks. The theory is that the New Economy is not as sensitive to interest rates since the companies are built on the sale of intellectual property (such as software) rather than physical goods. To an extent, that is true. But the New Economy companies are benefiting from a large influx of investment capital rather than borrowed capital. Sooner or later these companies must mature and make money. Some of these companies have seen the wisdom of merging their "vaporware" company with an Old Economy company. How that marriage will work remains to be seen. One thing is for sure - we live in very interesting times.

The man who wins may have been counted out several times, but he didn't hear the referee.

H. E. Jansen

TBONDS

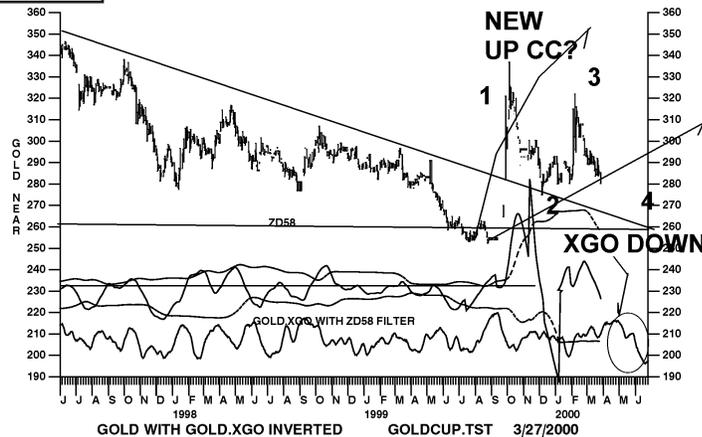

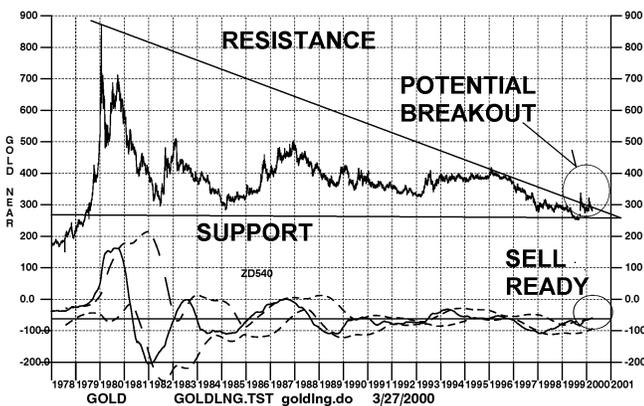

Tbonds have continued to rally off of the 90 harmonic price level. This rally is part of move 2 in the down Chaos Clamshell shown on the long term chart.

The near term chart shows a small up CC being formed by this rally. That CC is about to enter move 7 up. The XGO energy curve is up sharply into mid-April. I expect this rally to reach as high as 102. After that the energy starts dropping away so we can expect move 3 in the down CC.

Enthusiasm is the propelling force necessary for climbing the ladder of success.

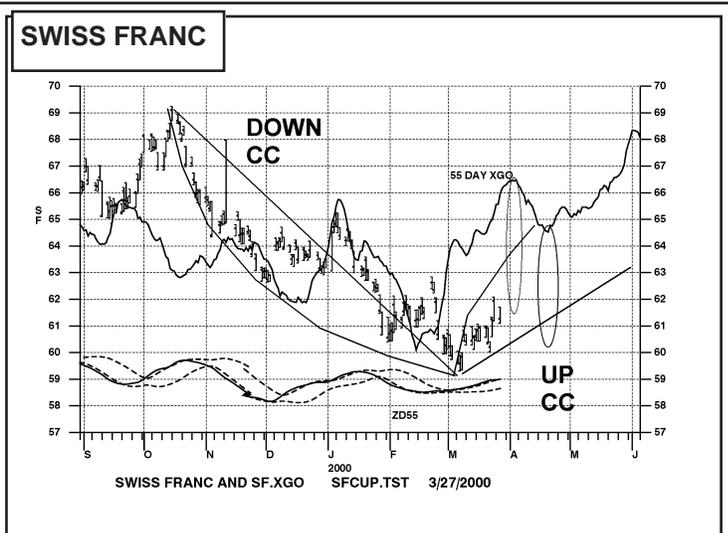

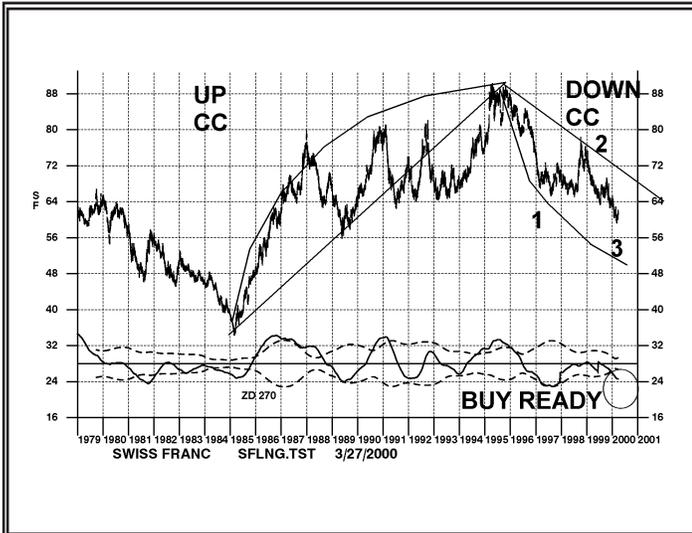

Unknown

GOLD

Gold is now headed lower in move 4 of an up CC. It may drop as low as 280, the long term support line shown on the long term chart.

The near term chart shows the 58 day energy cycle turning down into June. So it looks like, at least for now, the potential breakout of the large converging triangle (shown in the long term chart) is more potential than breakout. Traders should watch this dip very carefully. If prices reach 280 and hold it will be a good buying opportunity.

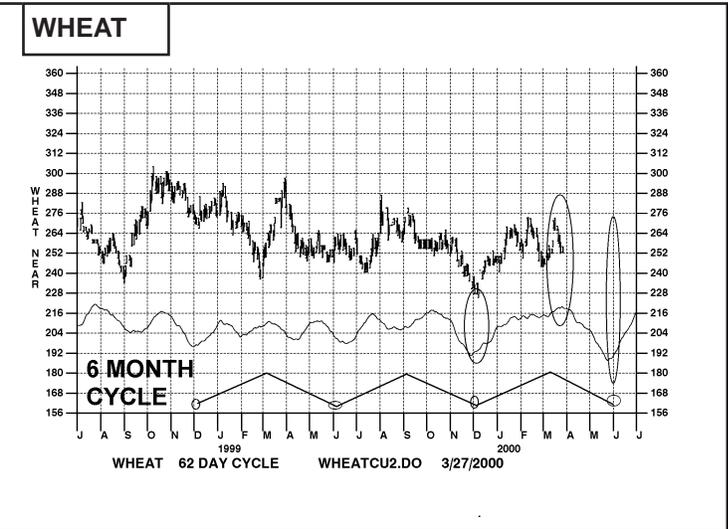

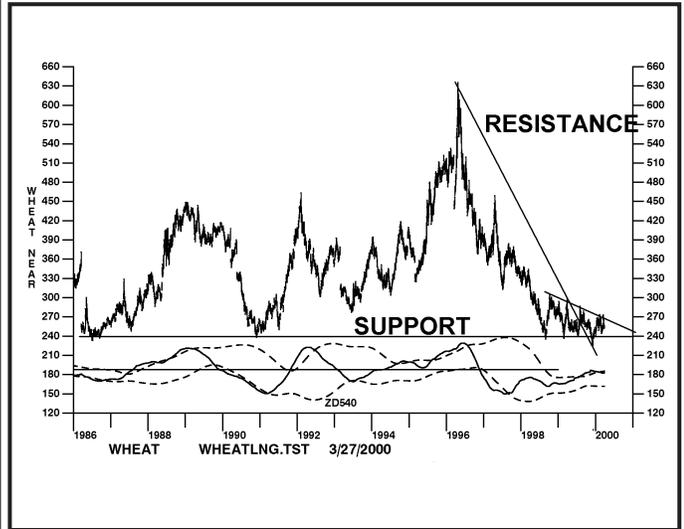

The Swiss Franc is currently forming a move 4 up in the down CC shown on the long term chart.

The near term chart shows that up CC in its early stages. Move 1 inside this smaller CC is nearly complete. The 55 day XGO cycle dips into late April, then rises sharply. That dip would be move 2 in this up CC. Watch it carefully for a buying opportunity or check our hotline for updates.

The worst bankrupt in the world is the person who has lost his enthusiasm.

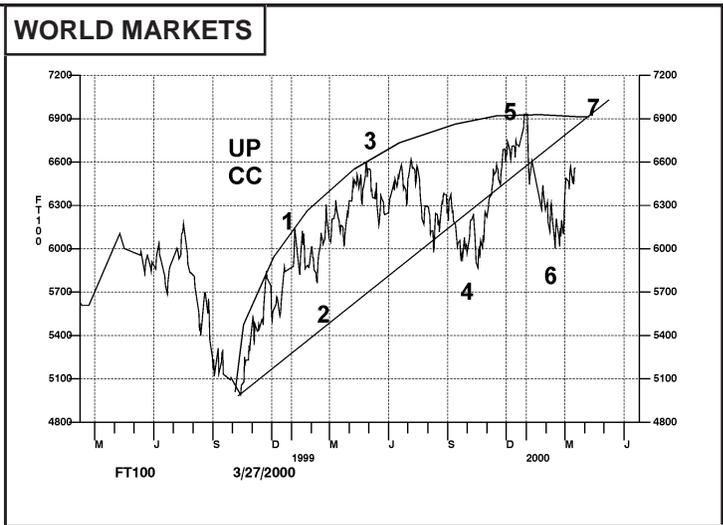

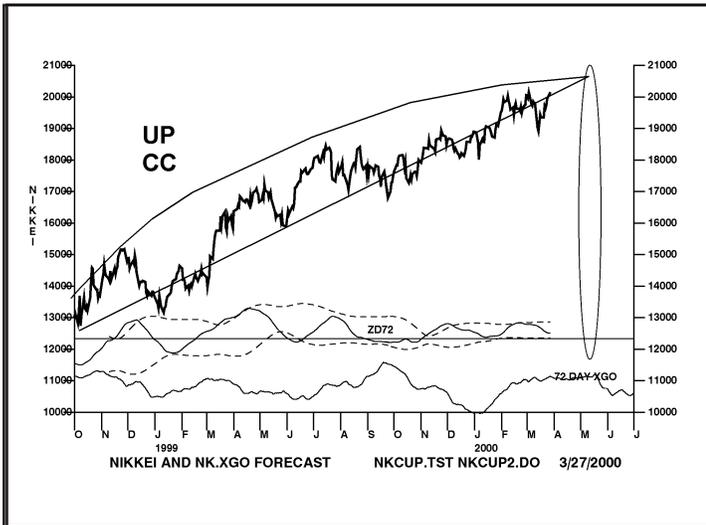

H. W. Arnold

Wheat has settled into a narrow trading range. This trading range is holding above the long term support at 240. The steep resistance line shown on the long term chart has been broken. Wheat is now holding below the shallow resistance line shown.

The near term chart shows this narrow trading range. Note how well the highs and lows are following the 62 day XGO cycle. That cycle is now turning down, with a low forecast in early June. This low will be a low in the 6 month cycle. Traders are looking to get short in wheat. Check the hotline for updates.

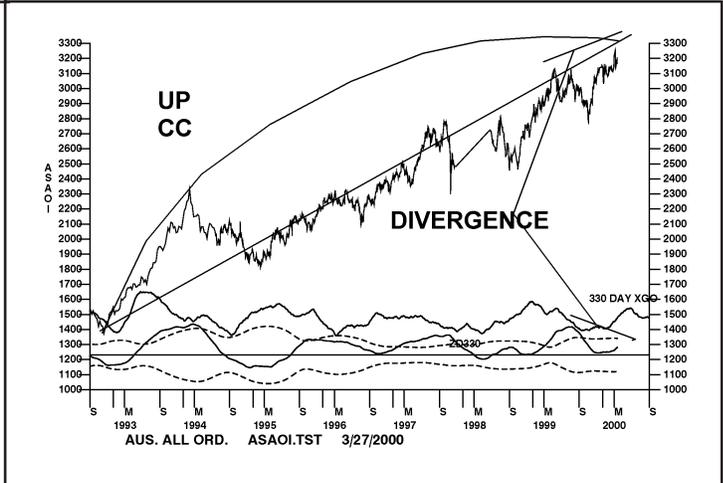

George Bayer wrote about trading wheat using Mercury, Saturn and Jupiter. You can learn to find astrocycles with the aid of the **Trader's Ephemeris** and the **Finding Astrocycles** video-**JUST \$99.**

The Japanese market made a sharp dip and then recovered to continue its rally. The 72 day XGO tops out in May so the rally may hold up until then.

The British market has also rebounded in what could be a move 7 in an expanded up CC. However, this rally has not reached the old highs, which is a sign of weakness ahead.

The Australian market has also rebounded to marginal new highs. However this rebound has formed a divergence between price and the ZD330 energy cycle. Such divergences are warnings of a major change in trend.

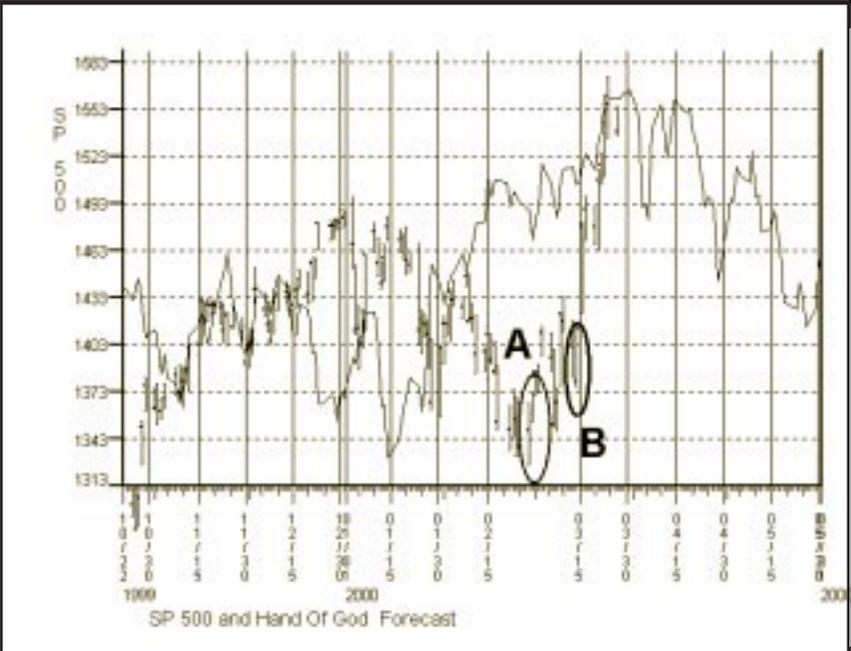

CHAOS CLASSROOM

Anyone who has seriously studied the market has discovered that cycles, or forecasts based upon cycles, suffer inversions. Inversions mean that the forecast “turns upside down.”

During the last three months, many of you have been dazzled by my Hand Of God forecast. Some of you were a little surprised when I didn’t share your enthusiasm. Yes, it was great trading while the forecast was working so well. But I knew that sooner or later an inversion would occur. This is exactly what happened. The chart shows the Hand Of God forecast inverted from last month’s chart.

What causes inversions? Inversions occur because of mathematical “singularities” in the energy fields. These are like black holes.

These singularities often occur at planetary conjunctions. Two such conjunctions occurred in March. At A, Mercury conjoined Earth. This is called “Combust.” The second conjunction occurred at B as Mercury conjoined Venus. Judging from the price action that followed the next few days, that one should be called “Super Combust.” Throw in the spring equinox with a full Moon on the 20th, and we had all the makings of an inversion and a sharp rally.

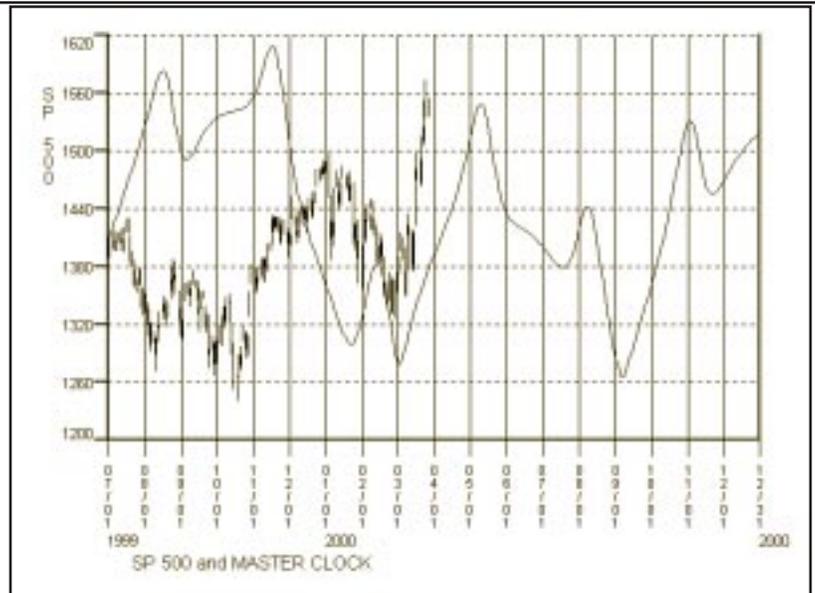

ASTROPHYSICS AND CHAOS THEORY

The Master Clock is a calculation of the tidal forces the planets exert upon the Sun. I have found that this energy calculation shows up somehow in every economic time series.

One can use the Master Clock as a source of information about when turns may occur. The turns and inflection points and crossings of the long term average of the Master Clock are often key turning points in markets.

Very often the Master Clock will act as a price forecast. Sometimes the forecast needs to be inverted.

The chart at the right shows that stock prices have been following the Master Clock pretty well since the beginning of the year. Looking ahead we can see that the solar energy is going to change in early May, and again in September. So we should be watching these months for major changes in markets.

ENERGY

I recently had the pleasure of spending two days with Adrienne Toghraie, (919) 851-8288. I

learned many interesting things from her, but the most interesting lesson was the connection between a person's energy flow and affluence. The word **affluence** means "to flow." Adrienne teaches that to be a world class trader, one needs to practice clean living and achieve a high energy flow.

One of the techniques used to do this is the practice of meditation. One sits calmly in the position shown to the right, and focuses on their breathing. The idea is to clear one's mind, while breathing deeply with your belly. She suggests doing this twice a day for 15 to 20 minutes.

Also shown on the drawing to the right are the location of the seven energy chakras. Each of these energy centers can act as a storage area for trapped energy. Energy trapped in these chakras blocks the flow of energy up the spine. Readers of my book, **Your Electric Life**, know that we humans were designed to live in the flow of electric current from ground to the ionosphere. The greater that flow, the more life force we have. The more life force we have, the more we excel at everything we do, the happier we are, and the more love, knowledge, and money that flows through us to enrich the lives of others.

I have found that I can combine this meditation exercise with use of my Energy Charging Kit and Concentration Headband. I find that this is a great boost in the morning and afternoon. So if you want to increase your affluence, try increasing your energy flow.

QUALITY IMPROVEMENT

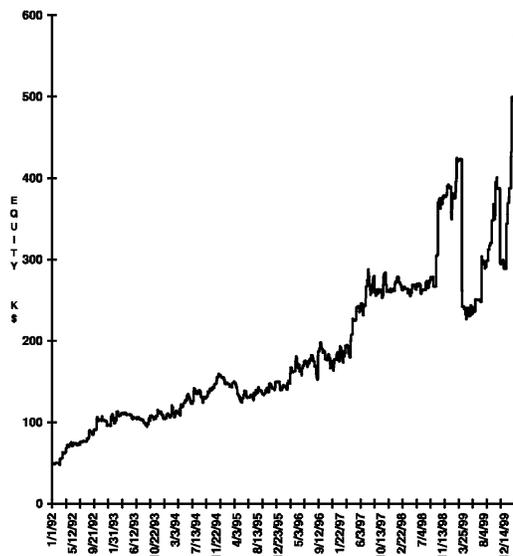

My quality improvement efforts this month were internally focused, so there is not much to write about.

However, we did encounter a major technical problem this month. A fan died in our web server that caused the box to overheat. An overheated box can ruin hard disc drives and melt backup tapes. Fortunately the mother board we use has a thermal shut down. It shut down the entire computer. This required a quick trip to the machine room by my son, Mark, (Kineticworks.com). Mark quickly deduced why the machine had shut down, replaced the power supply, and had us back on the air in 2 hours. It's a real pleasure to have your web server supported by someone of Mark's quality. Thanks, Mark.

We are continuing to work on our Chaos Trader program, and are happy to report that we did, indeed, slay the elusive bug. Hopefully in the next few months we will complete the list of features we are adding to this program and be able to release it.

We use this program in our position trading. You will notice that even though our forecast inverted we did not give up much of our recent gains.

PEOPLE AND HAPPENINGS

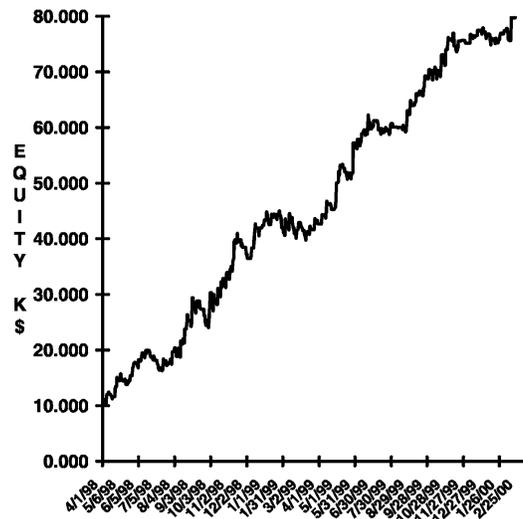

Thank you for the many emails and phone calls. I sincerely appreciate your interest in my work and products.

My big event this month was my visit with Adrienne Toghraie. I spent two days with her in her office in Cary, North Carolina. I won't go into the details but I can tell you that it was an amazing experience. One of her references had told me to expect to have my mental closets cleaned out. Instead, I got my physical, mental, emotional, and spiritual house cleaned from top to bottom. Adrienne is a master at what she does. She helps traders become better traders. One of her traders went from \$70,000 to \$3,000,000 in one year. He is now on track to exceed \$10,000,000 this year. If you are interested in working with her, call Adrienne at (919) 851-8288.

Spring is here and it's time to start thinking ahead to summer and vacations. Whatever you do the rest of the year, be sure not to waste the opportunity to enjoy life this summer. All for now. See you next month.

Hans

Your Electric Life, Science for a New Age

by Dr. Al Lason, Ph.D. (aka Dr. Hans Hannula)

Whether you realize it or not, you are being strongly influenced by a very powerful electrical force - the earth's electric field. This field produces currents through your body that are 250,000 times as strong as the currents that run your brain. Recognition of this fact, research, and experimentation have led former Bell Labs engineer and scientist Al Larson to a series of insights into many previously unexplained phenomena. His findings cover a wide range of topics, such as dowsing, the human aura, consciousness, bio-circuits, Feng Shui, natal astrology, stock markets, remote viewing, energy field medicine, de ja vu, dreams, and religious experiences. His own discovery of *sudden impulses* *shows how we are all connected by the field in a *Cosmic Internet**. Al provides a rational explanation of how these phenomena work through the earth's electric field, along with guidance of how this knowledge can be used to improve your own life. Do not miss this clear, concise, convincing explanation of how things work.
